Height: 8 feet

Spread: 6 feet

Sunlight: ○ ◐

Hardiness Zone: 4

Description:

A 3-season medium sized shrub valued for its prolific light pink trumpet-shaped flowers in late spring on broadly arching branches; foliage emerges gold with bronze tips fading to yellow over the summer, fall color is a stunning golden-orange

Ornamental Features

Dream Catcher Beautybush features dainty pink trumpet-shaped flowers with buttery yellow throats along the branches in late spring. It has attractive coppery-bronze-tipped yellow foliage which emerges gold in spring. The pointy leaves are highly ornamental and turn an outstanding orange in the fall.

Landscape Attributes

Dream Catcher Beautybush is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Dream Catcher Beautybush is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Dream Catcher Beautybush will grow to be about 8 feet tall at maturity, with a spread of 6 feet. It tends to be a little leggy, with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
