

Zebrina Banana Musa acuminata 'Zebrina'

Height: 6 feet Spread: 4 feet

Sunlight: ○ •

Hardiness Zone: 9

Other Names: Musa zebrina

Description:

A small, upright banana cultivated for both fruit and ornamental purposes; best suited to warm temperate climates, but are often root hardy in mild winter zones; a nice, manageable container plant for bright indoor areas

Features & Attributes

Zebrina Banana's attractive enormous oval leaves remain bluish-green in color with showy burgundy variegation throughout the year on a plant with an upright spreading habit of growth. The brick red stems are very effective and add to the plant's interest.

This is an herbaceous houseplant with an upright spreading habit of growth. Its wonderfully bold, coarse texture is quite ornamental and should be used to full effect. This plant should never be pruned unless absolutely necessary, as it tends not to take pruning well.

Planting & Growing

When grown indoors, Zebrina Banana can be expected to grow to be about 6 feet tall at maturity, with a spread of 4 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
