

My Girl Rose

Rosa 'BAlgirl'

Height: 4 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: 4

Group/Class: Easy Elegance Rose

Description:

A supremely fragrant hardy rose with intensely deep pink nearly double flowers which recur throughout the summer; extremely disease resistant even to black spot, makes a hot accent for the garden

Ornamental Features

My Girl Rose is draped in stunning fragrant semi-double fuchsia flowers with buttery yellow eyes at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has emerald green deciduous foliage. The glossy oval compound leaves turn yellow in fall. The fruits are showy red hips displayed in late fall.

Landscape Attributes

My Girl Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

My Girl Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

My Girl Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
